

# Bizolap

Shiplap modular roof slope

**Bizolap** is a system composed of shiplapped expanded polystyrene slope insulation panels, laminated or not, which provides efficient draining and insulation.

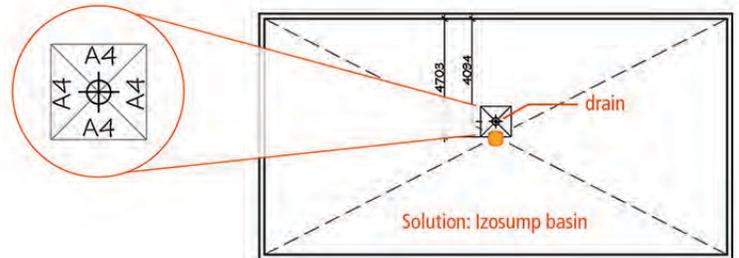

- IZOSUMP**  
1220 mm x 1220 mm (4' x 4'), slope 1:25 (4%)
- Intermediary basin**  
3657 mm x 3657 mm (12' x 12'), slope 1:50 (2%)
- Following basins**  
6095 mm x 6095 mm (20' x 20') and more, slope 1:100 (1%) or more

## The Izosump basin! A must!

A slope in the roof structure is far from being synonymous with a good drainage.

As shown by the plan below, the low point (●) is rarely a roof drain. Adjustments to the roof slope must be carried out to ensure that the lowest points are drains.

## Reliable solution

The necessary support is provided by our technical team thus ensuring a successful application of Bizolap.

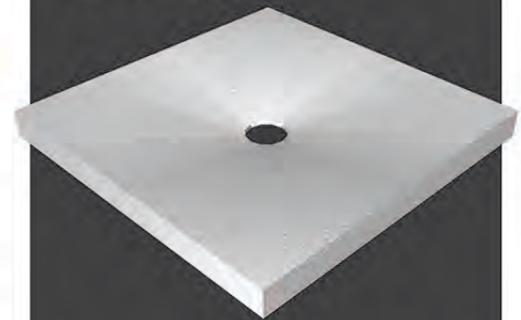

With its unique design, Bizolap offers to the professionals a greater flexibility and adaptability when drawing plans.

The shiplap on the four sides of the Bizolap allows a perfect continuity of the thermal insulation of the roof with a single operation.

Insulation thickness is up to 8" to meet required R-Value in a single production step of installation of the modular roof slope.

The high dimensional stability of the expanded polystyrene provides continuous base to the waterproofing system.

## IZOSUMP

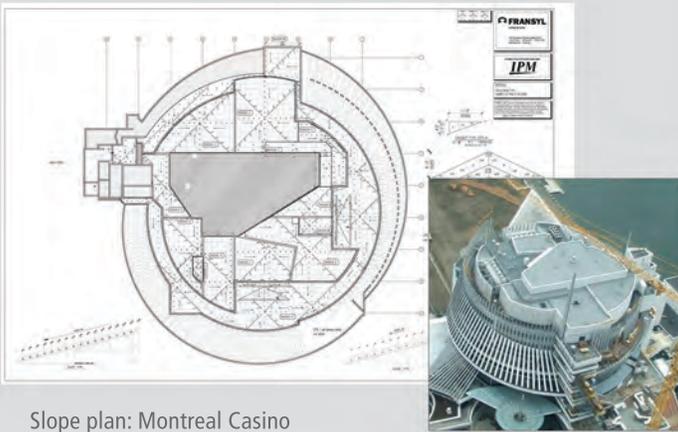

The basin shape of the starting panel, with its 4% integrated slope, allows for positive drainage.

# IPM

## MODULAR TAPERED INSULATION SYSTEMS

IPM includes services such as the designing of modular slope plans, as well as expert services on the construction site.

Slope plan: Montreal Casino

## Our warranties

Our 40 year R-Value warranty is free on our expanded polystyrene insulations.

When installed by a Fransyl accredited applicator, we offer for free, on our Bizolap system, our 5 year slope warranty which ensures drainage within a period of forty-eight (48) hours.

## The different Bizolap

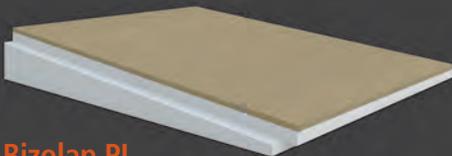

**Bizolap**  
no lamination

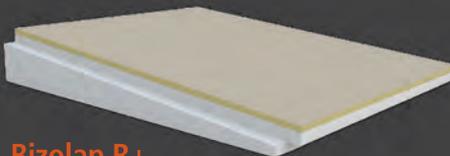

**Bizolap FB**  
laminated to a natural fiberboard panel

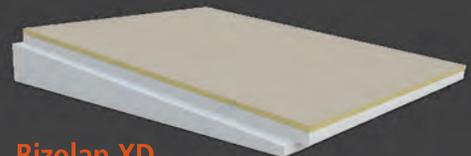

**Bizolap FR**  
laminated to a fire resistant fiberboard panel

**Bizolap PL**  
laminated to a perlite panel

**Bizolap R+**  
laminated to a composite panel

**Bizolap XD**  
laminated to a HD recover board

As an important distributor of insulation and waterproofing products, as well as a manufacturer of expanded polystyrene, **Fransyl** fosters a culture of differentiation. We continuously aim to exceed expectations in all aspects of business, including maintaining solid and professional relationships with our partners, clients, prescribers, employees and suppliers. Over the years, we at **Fransyl** have developed relationships based on expertise and assistance which value all types of support. Proud of our corporate philosophy, we at **Fransyl** will demonstrate our commitment to the quality and strength of our relationships through a signature that reflects our attitude:
