DESCRIPTION

Grooved expanded polystyrene insulation, shipped on all four sides, designed to facilitate the drainage of water to the drain.

CERTIFICATIONS

- Meets ASTM C 1338 Standard, R04-690 report; test methods to determine mold resistance.

INSTALLATION

1. Place the insulation board with the grooves on the side of the foundation wall.
2. Secure the insulation with 5 appropriate fasteners, positioned at each corner and center of the panel.

ADVANTAGES

Low Water Absorption

The closed cell walls are waterproof and as such, water can only penetrate in channels located between polystyrene cells that are held together.

High-Dimensional Stability

According to industry standards, EPS is one of the leaders in terms of size maintenance. This helps the system to remain fully waterproof at all times.

Captive Gas; 98% Air and 2% Plastic

This formula has been used for more than 50 years. It does not contain any VOC, CFC's, HCFC's, Formaldehyde or any gas that can impact the ozone layer. Furthermore, this provides the product with premium features including its light weight and the maintenance of R-Value.

Environmentally Friendly

EPS is 100% recyclable and contains 10% recycled materials. Produced locally, the distance between the plant and site is often shorter than other products of the industry.

Mildewproofing

EPS contains materials that do not support the growth of bacteria such as spores and mushrooms.

Meets High Standards

Helps to reach Novoclimat (in Quebec if applicable), EnergyStar (Ontario and the Maritimes) and R-2000 (Canada) insulation levels.
