

### DESCRIPTION

- Alternative method for securing Flash-Tite™ Drains to structural decks.

### TECHNICAL DATA

Flash-Tite™ Deck Clamps are fabricated from heavy gauge aluminum. 18" long, Deck Clamps fit all styles and sizes of Flash-Tite™ Drains.

### INSTALLATION

Deck Clamps can quickly be installed from the underside of the deck by simply fitting the clamp around the downspout and tightening two fasteners.

### SPECIFICATIONS

Deck Clamps should be included with a Flash-Tite™ Drain specification by simply specifying that the Flash-Tite™ Drain is to be secured to the structural deck with Flash-Tite™ Deck Clamps. For a more detailed specification, add the following example paragraph:

Drains shall be secured to the structural deck with Flash-Tite™ Deck Clamps. Deck Clamps shall consist of 1.25 mm thick aluminum bar, secured with two stainless steel screws. Deck Clamps shall be fastened around the drain downspout and tightly positioned against the underside of the deck.
